The EBC Mobile Device

The EBC Mobile Device is an ideal tool for help in various crisis situations such as:

• Fire • Earthquake • Collapsing buildings • Floods • Railway and other traffic accidents • Various situations where, by rapid intervention, removing metallic, concrete and other obstacles to rescue life and property

The mobile kit includes

- The EBC Device - electrode holder 10/12/17
- Package of electrodes
- Adjustable oxygen bottle holder
- Steel bottle of 10 liters for oxygen - loaded
- The oxygen hose
- Reducing valve for oxygen
- Electrode ignition kit: battery, contact cables and copper plates
- Spare Teflon gaskets and rubbers resistant to oxygen
- Protective leather gloves and safety glasses DIN 5

Technical characteristics

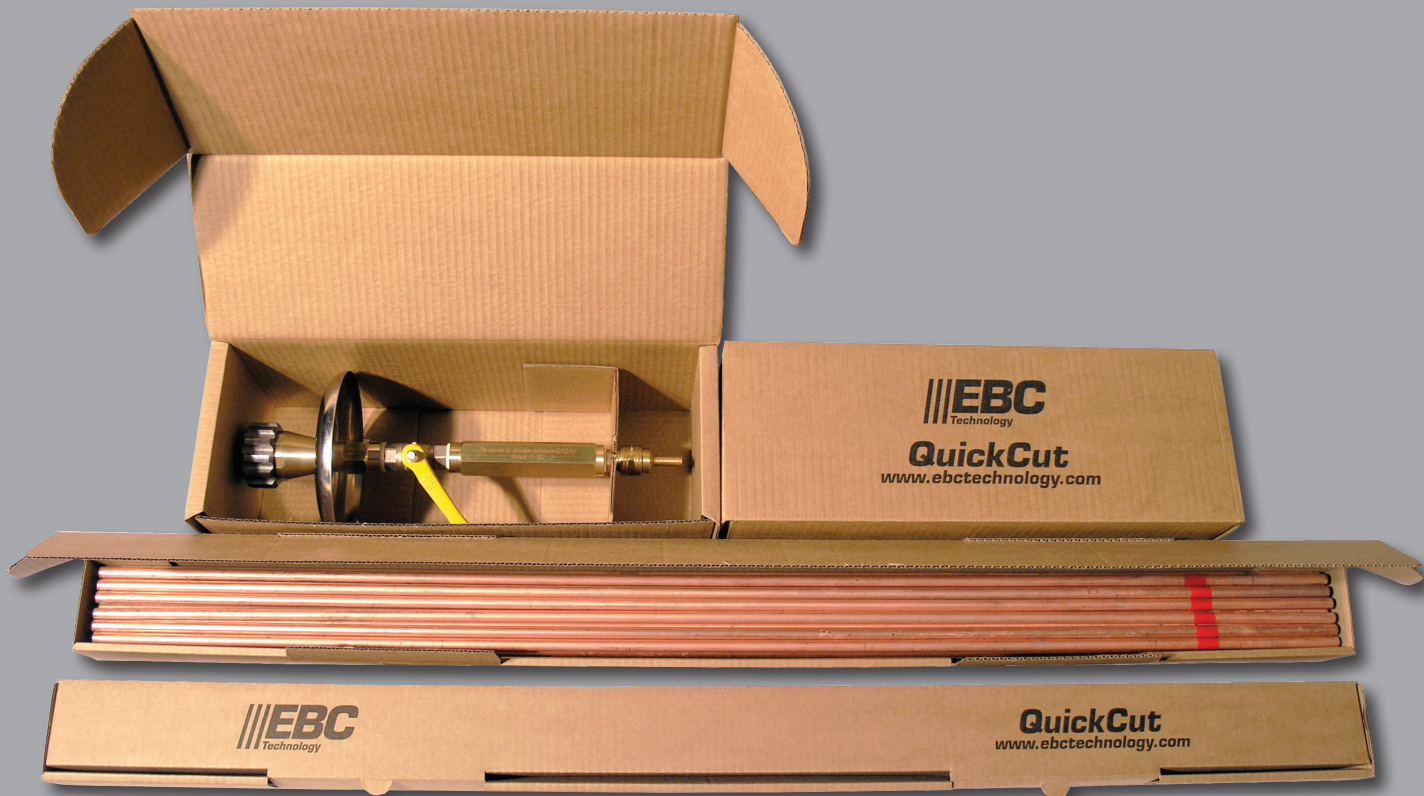

- The EBC Device is very lightweight and easy to handle and is easy to move it fast to the workplace, which is particularly suitable for working on difficult to pass and hard-to-reach terrains (worn and used as a hand-held accessory). The effectiveness is the same as on land and under water, which is tested in various conditions.
- Maintenance and application of The EBC Device is simple.
- Durability and endurance is tested in the toughest working conditions.

The EBC Device on the top of the tubular electrode develops a temperature of approx. 6000 to 6500 ° C and has the ability to quickly melt and remove literally any material on the way.

For the protection and rescuing people and property, nothing can stand us in the way. The EBC Mobile Device is a must-go help where is needed to act quickly and overcome/eliminate obstacles of all kinds.
